

NECKHANGER APPLICATOR

Designed with POP marketing of wine in mind, **Fusion's** BNA feeder efficiently applies neckhangers to bottles without slowing down most filling lines. System integrates easily into existing lines and runs either Fusion's own neckhangers or those already being used by the customer. Easy to implement and run, the system accommodates a variety of hanger styles to meet the customer's specific branding needs.

So easy, you'll have time for those other things.

Label-Aire's latest primary applicators make labeling easier than ever.

When our customers asked for a labeler that was easy-to-use and production-tough, we took plenty of notes. Our advanced Primary Applicator line delivers top-notch performance on even the most difficult applications. It's loaded with features that make operating simple and virtually maintenance-free, like automatic setup, user-friendly control panel & display, stepper motor technology, and Zero Downtime Labeling capability. And it's all backed by the industry's most experienced and responsive distributor network. The next time things get a little sticky, specify a Label-Aire.

TAPE DISPENSER/PRINT SYSTEM

The Better Pack 500 ink-jet system from **Better Packages** consists of the Better Pack 500 tape dispenser with an integrated digital thermal ink-jet printing system. It delivers 300 dpi, on-demand printing of changeable alphanumeric messages and logos directly on the tape as it is dispensed. Manufacturers and distributors of food, beverages, pharmaceuticals, or any product requiring time, date, or code stamping or messaging can improve productivity while eliminating the cost of purchasing preprinted tape. Prints a 1- or 2-line message in variable character heights with up to 3 logos in each message. Up to 99 messages can be stored for frequent and easy changeover. The print system is engineered by **Digital Design** and relies on the ink-jet cartridge technology of **Hewlett-Packard**.

WASH-DOWN CASE TAPER

New from **EZ-Tek Industries** is the BB-2/S stainless-steel case-taping machine, designed for large-run case sealing in a wash-down environment. The BB-2/S uses p-s tape and features self-centering side rails, a rugged bottom belt drive, and a heavy-duty mast that easily adjusts to handle a variety of case sizes. Unit offers fast and easy case changes with adjustable side rails and flexibility ranging from 4 $\frac{1}{2}$ " to infinite box length. Also capable of sealing cases ranging from 4" to 22 $\frac{1}{2}$ "W and 3 $\frac{1}{2}$ " to 22 $\frac{1}{2}$ "D. Adjustments are made "on the fly" with easy hand-tighten knobs on a single-mast design. Top and bottom heads are interchangeable and tip back for easy threading. No air is required to run the system, so it can be placed anywhere in the factory.
